TCP & IDP

Complementarities: **types of activities** and **targeted areas**

*TCPs provide the technical knowledge and synergies for an effective direct common identification and transfer of results in cooperation with the **thematic projects**. The TCPs respond with the thematic projects to short-term expectations/solutions and directly in and for the territories **but not in an isolated way**, i.e. not project by project but as Programme as well*

*IDPs identify and mobilise relevant actors to which the results could be transferred to support, improve and implement future policies, **upscaling the action of the thematic community projects**. The IDP has a medium-term reflection to anticipate and support the design of new policies in a more strategic way. Beyond the Programme area, IDPs seek to reach out to external actors responsible for implementing/improving policies in their respective mission and liaise sustainably with them. **The exchanges are based on the results of the projects for which the IDPs receive support from the TCPs***

TCP & IDP

GPs amplify the results of the **STUDY, TEST, TRANSFER (modulars)** and **STRATEGIC TERRITORIAL THEMATIC PROJECTS** related to their respective 4 Programme Missions in a complementary way:

Technical

Political

- ✓ TCPs analyse the results from the thematic projects and have the technical expertise for transferring solutions.
- ➔ ✓ IDPs analyse the political state of the art, identifying needs and opportunities in relation to the analysis made by the TCP,s and seek for potential matches to influence policies.

Thematic Community projects approach in a nutshell

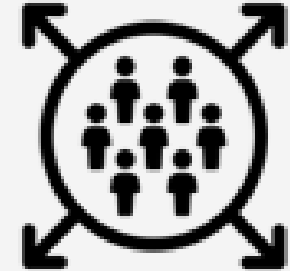

Creating synergies

Identifying best solutions among individual projects (combine them when relevant)

Answering Programme's Missions through enlarged thematic transferring actions into Euro-MED territories and outside if possible

Created by Rubem Hojo
from Noun Project

Example from Natural Heritage Mission

- ✓ *Setting up of the Community. - -->> Mediterranean Resilience Network.*
- ✓ *Thematic working groups participated by all projects and associated partners.*
- ✓ *Tailor-made path for solutions' transfer process (mentorship)*
- ✓ *Joint communication for specific topics: amplification through awareness raising campaign*
- ✓ *Peer reviewing of relevant solutions.*
- ✓ *....more*

Institutional Dialogue Projects approach in a nutshell

Creating favourable conditions to make results of Thematic Projects relevant also beyond the Interreg Euro-MED world

Supporting the transfer of successful activities to local, regional and national authorities and their integration in the development of policies and strategies at different levels (mainstreaming)

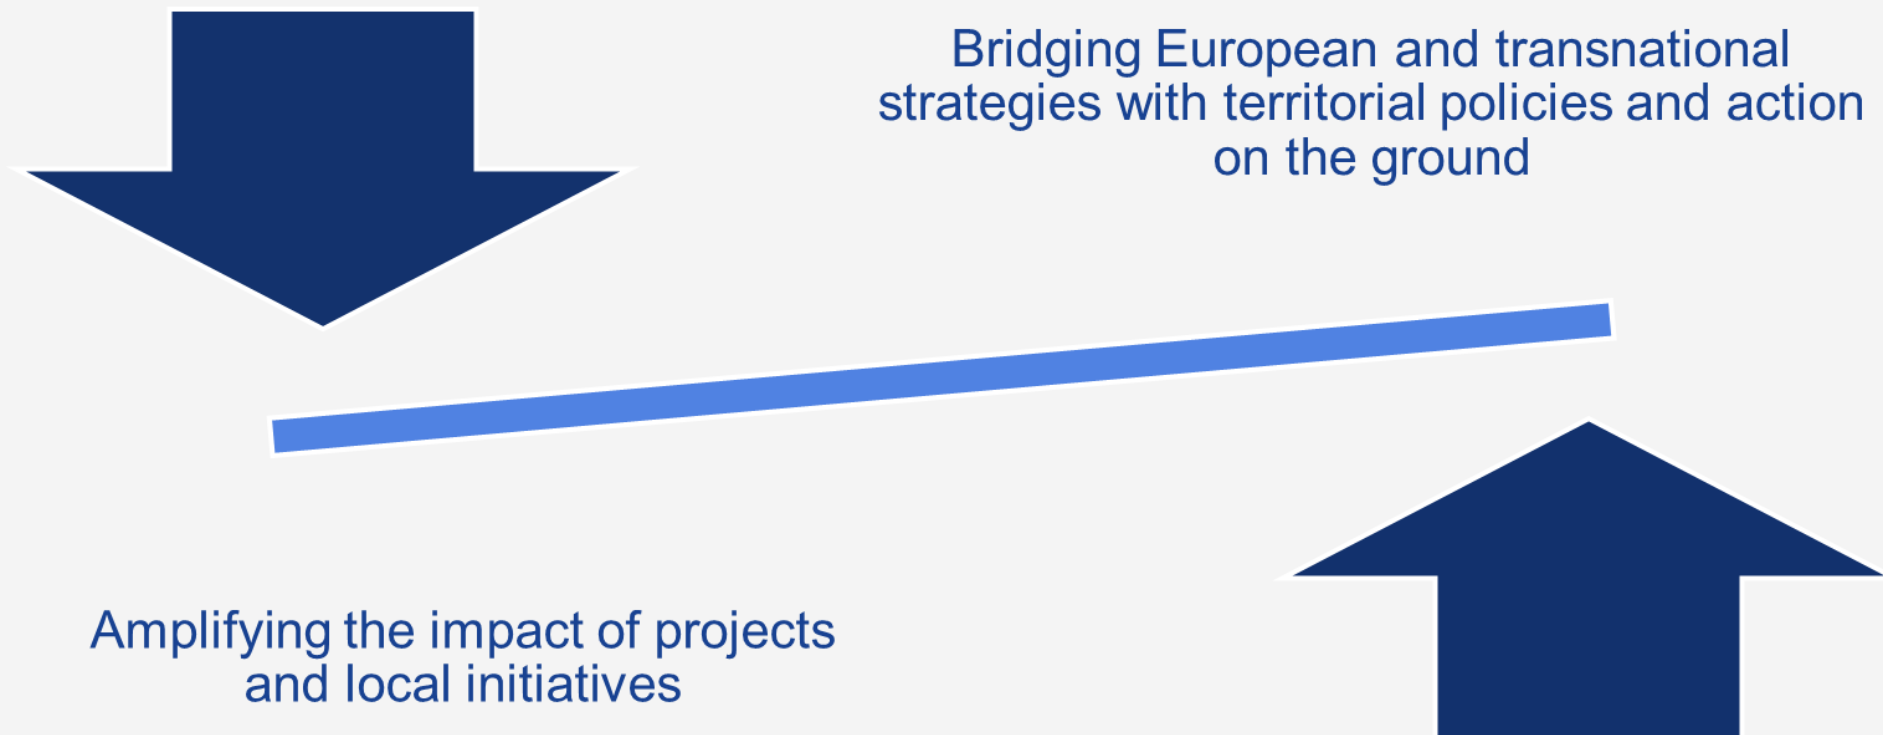

Setting up long-lasting conditions for a permanent institutional and social dialogue to bridge the transnational dimension with the local solutions

Programme Result Amplification Strategy (RAS)

Result Amplification Strategy - Actors

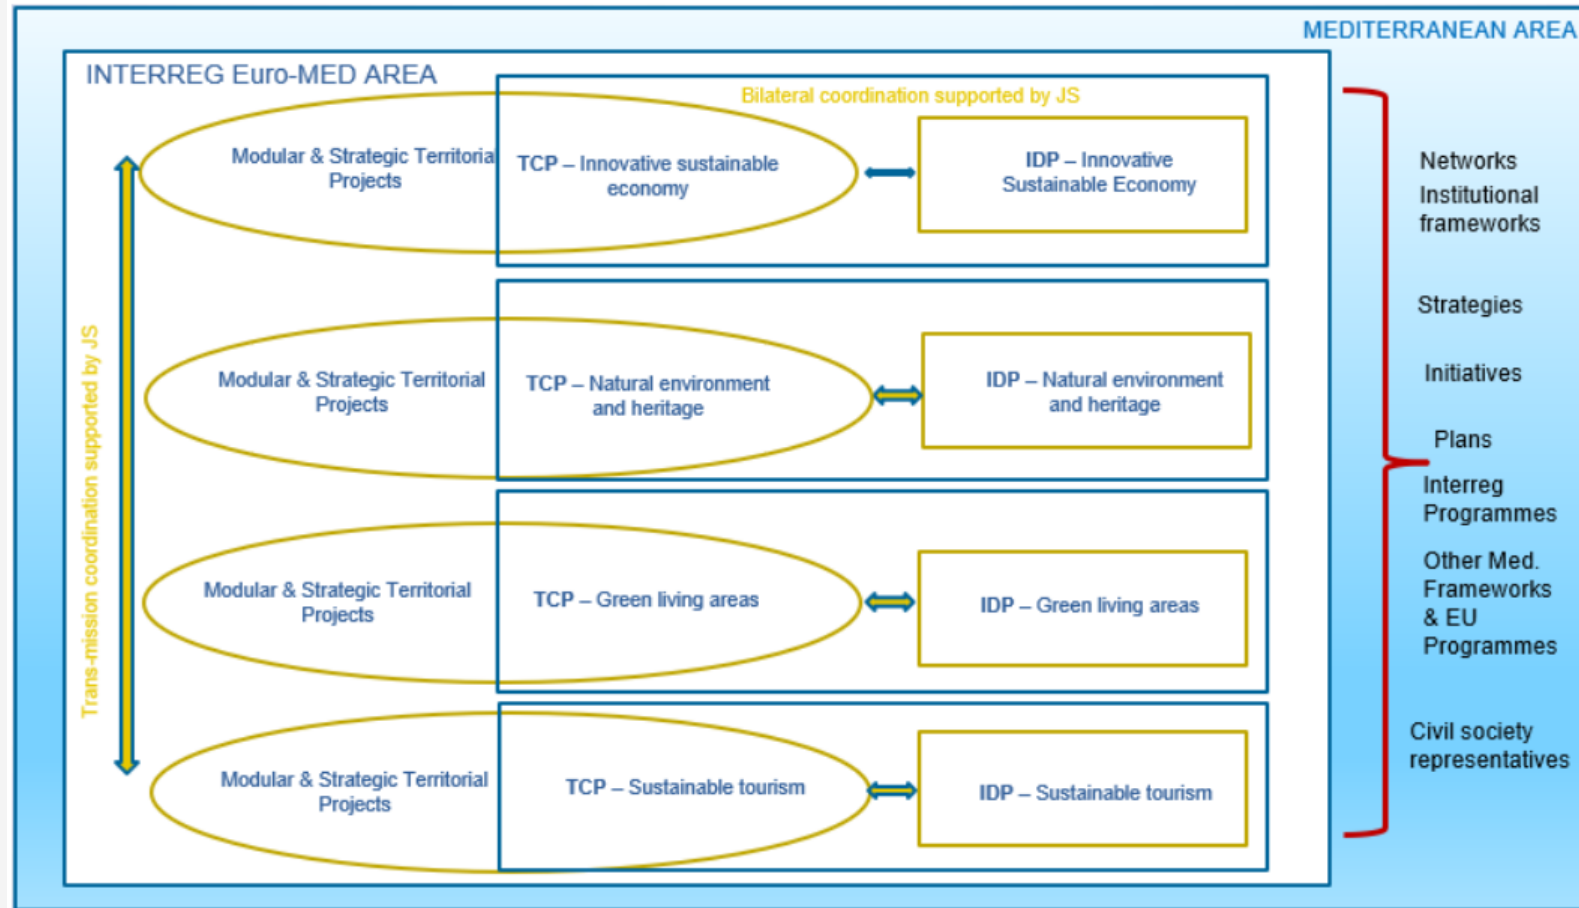

Result Amplification Strategy - Objectives

Facilitate the exploitation, **sharing and reuse** of knowledge, experiences and project results by other Euro-MED projects or other programmes and foster the production of relevant work

Encourage the **transfer** of practices and results to other actors and territories and their integration in the development of local, regional, national and European (mainstream) policies and strategies

Increase **coordination** between actors acting on the Mediterranean (multi- level, transnational) based on this acquired knowledge, experience and results

Coordination mechanism for common work
